A MESSAGE FROM THE JUNIOR VICE PRESIDENT

Fujipipes ensures that it stays competitive by being strategically located to service the Visayas Region and nearby provinces, ensuring faster delivery time while reducing logistic costs.

As we continually strengthen our business and the Company, we emphasize our commitment to our stakeholders (customers, suppliers, our people and the community) considering their importance to our processes and strategies.

Moving forward, we are committed to focus on technology, our people, and improvements in our processes to bring the latest, high quality and most innovative products into the market.

JR DAVID

About Us

Central Negros Fujipipes Industries, Inc. was officially registered at the Securities and Exchange Commission in March 2013 and has been producing ISO - BPS certified products since July 2014.

Technical aspect for production inspection is addressed by a government certified material testing agency while product certification under the PS Mark Certification Scheme is the cornerstone for commercial operations.

WHY CHOOSE US?

- COMMITMENT OF GIVING QUALITY PRODUCTS TO YOU RIGHT HERE, RIGHT NOW
- QUALITY STARTS FROM THE SOURCE
- CUSTOMIZED TO YOUR OWN NEEDS
- QUALITY MANAGEMENT
- DELIVERY AND LOGISTICS
- HONESTY

FUJIPIPES

Our HDPE Pipes are a cost-effective solution for a broad range of piping troubles in municipal, industrial, marine, mining, landfill, duct and agricultural applications. It has been tested and proven effective for above ground, surface, buried, slip lined, floating, and sub-surface marine applications. HDPE pipes are best on projects for water supply, agricultural and those that deal with chemicals, thus, can carry potable water, wastewater, slurries, chemicals, hazardous wastes, and compressed gases.

BENEFITS of HDPE pipes

- Lower life cycle costs
- Corrosion resistant. Does not rust, rot or corrode
- Leak tight. Heat-fused joints create a homogenous, monolithic system. The fusion joint is stronger than the pipe
- Maintains optimum flow rates. Does not tuberculate, has a high resistance to scale or biological build-up
- Excellent water hammer characteristics. Designed to withstand surge events
- High strain allowance. Virtually eliminates breakage due to freezing pipes
- Additional cost savings are achieved by lower instance of repairs
- With no exfiltration or infiltration, potable water losses and groundwater nuisance treatment costs encountered in traditional piping systems are eliminated.

Multiple Applications

One system from the source to the outlet of the pipe connection.

The Fujipipes Butt Fused Pipes

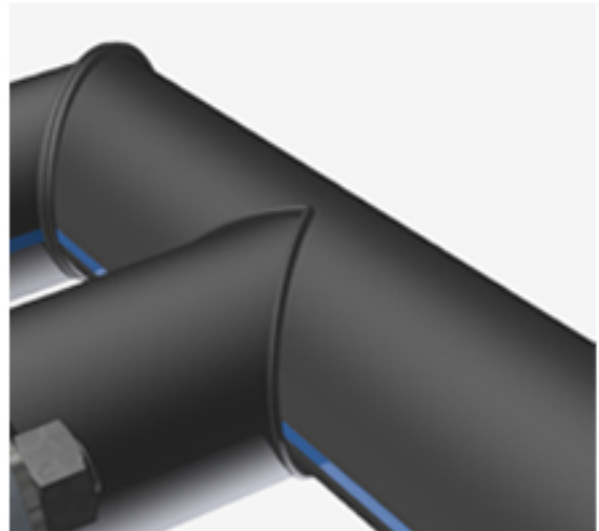

- No exfiltration, infiltration and potable losses
- Designed to withstand surge events
- High strain allowance
- Lower instance of repairs

The Fujipipes HDPE Assembly

- Easy installation
- Strong connection
- High quality valves
- Cost saver

The Fujipipes Saddle Fused Pipes

- Leak tight
- Maintain optimum flow
- Does not tuberculate
- Fusion joint is stronger than
the pipe

OUR PRODUCTS

BUTT FUSION MACHINES

We provide an assurance to our customers that Fujipipes only follow the standard procedures set by ISO.

11.1 MACHINES

EUROPEAN STANDARD FUJIPIPES RIYANG

SPECIFICATIONS

Hydraulic Butt Fusion Machine

Model: V315

Welding Range: 90-315mm

Included Inserts: 90, 110, 125, 140, 160,
180, 200, 225, 250, 280 mm

Power Supply: 220 VAC

Single Phase: 50/60HZ

Rated Power: 5.25 KW

Pressure Range: 0-80 Bar

Cylinder Section: 20.02 cm²

With accumulator, USB charger, Oil Sucker

Premium instrument box

ASIAN STANDARD ROTHENBERGER WUXI
